WORKSHOP:

May 1-3, 2009

Bastyr University
Seattle, WA
Retreat/Nature Center
*Complimentary
Hot Organic Meals*

with Stanley Krippner PhD, Consciousness Pioneer

A once in a lifetime opportunity to explore and revise the hidden story that keeps your life in a repeating pattern, with Dr. Stanley Krippner, PhD., a living treasure in Dream Study and Mind-Research. Through dream, art, process, and Gestalt work, he will guide you to discover the story that is living through you, showing that the greatest opportunity for transformation is precisely in how you consciously evolve your myth from what is no longer working for you.

Dr. Krippner is internationally admired for his scientific investigation of human consciousness from a transpersonal perspective. His work has been endorsed by Joseph Campbell, Jean Houston, June Singer, and other great classic teachers of mythology. He has authored timeless books including *Personal Mythology*, *Dream Telepathy*, *Dreamworking*, and *The Mythic Path*.
